

## Keeping a Menstrual Calendar

When you are thinking of becoming pregnant, you'll want to keep track of your menstrual cycle. By charting your menstrual periods on a calendar for a few months, you'll be able to spot patterns in your cycle (how many days your periods last, for instance, and whether your cycle is typically 25 or 30 days long). You'll also be able to pinpoint the days that you are most fertile—it is most often halfway between the start of one period and the start of the next. To use the calendar, simply circle the days that you menstruate each month. If you can, chart your cycle for a few months and bring the calendar along with you to your checkup.
